

What to Expect: Mobile Candle-Making Workshop

Before Your Event

Once your event is booked, I'll confirm your guest count, location, and any special requests. A reminder will be sent prior to the event with my arrival time and any setup requirements.

Setup

I'll arrive approximately 30–45 minutes before the workshop begins to set up the guest workstations so everything is ready when your guests arrive.

Welcome & Introduction

We'll kick off the experience with a brief introduction, workshop overview, and safety instructions. I'll explain the candle-making process and answer any questions before we begin.

Choose Your Signature Scent

Guests will explore a variety of fragrance options and can create a custom scent blend or choose a favorite fragrance. I'll provide recommendations and guidance throughout the process.

Candle-Making Experience

Each guest will create their own custom candle by blending fragrances and pouring their candle. Depending on the package selected, guests may also personalize their candle with custom labels.

Mix, Mingle & Cooling Time

While candles cool and begin to set, guests can relax, mingle, enjoy refreshments, take photos, and learn candle care tips. This is a great opportunity for conversation and celebration.

Finishing Touches

Once the candles are ready, guests will add labels, lids, and packaging. I'll also provide candle care instructions and curing recommendations.

Wrap-Up

We'll finish with a group photo (optional), final questions, and information about future workshops, referrals, and social media sharing.

Cleanup

After the workshop concludes, I'll handle all cleanup and pack up supplies, leaving the space as I found it.
